

Jane Bromberg
Supply List for Finishing Up!

I will provide written instructions for 6 finishing techniques.

TECHNIQUE 1-Accent Strip Attached and Floating

TECHNIQUE 2 – Two-Pieced binding

TECHNIQUE 3-Turned Facing

TECHNIQUES 4 & 5-Prairie Points and Turned Down Back

TECHNIQUE 6- Edge Circles and Traditional Facing

Supplies:

Sewing machine in good working order, patchwork foot, and bobbins. Power cord, pen or pencil, pins, thread, scissors, rotary cutter and small mat. Iron and pressing surface (provided by guild)

This is very important!!!

Before class, prepare 3 quilt sandwiches.

Make two 14” square sandwiches

one 10” square sandwich

Construct each sandwich from muslin OR fabric you no longer like OR scraps.

This is what you will be using as a base for learning the techniques.

Layer batting between two pieces of fabric-sew around the edge ($\frac{1}{4}$ inch) and stitch a simple “x” diagonally from corner to corner.

Make two that are 14” square and one that is 10” square.

TECHNIQUE 1-Accent Strip Attached and Floating

Two strips of fabric $1\frac{1}{2}$ ” by 12”- pressed with the long edges wrong sides together.

Two leftover binding strips from your stash that are at least 16” long. If you don’t have leftover binding-make binding by cutting a $2\frac{1}{4}$ by 16” strip. Fold in half lengthwise and press.

TECHNIQUE 2 – Two-Pieced binding

One strip of fabric $1\frac{7}{8}$ ” by 14”

One contrasting strip of fabric $1\frac{1}{4}$ ” by 14”

TECHNIQUE 3-Turned Facing

One 10" square of fabric

One 10" quilt sandwich*-see above

TECHNIQUES 4 & 5-Prairie Points and Turned Down Back

Six -3 ½" squares

TECHNIQUE 6- Edge Circles and Traditional Facing

Two 4 ½" by 18" strips of fabric

Cut three 3" circles of fabric #1

Cut three 3" circles of a contrasting fabric #2

(Use a template or a household item to trace your 3" circles. If your circles are slightly bigger or smaller than 3", that is fine, as long as they are all the same size.)

Sew one circle of fabric #1 to a circle of fabric #2- right sides together with ¼" seams. Do this for all three pairs. We will continue the process in class. Making the circle pairs ahead of time saves time in class.
