

Starmazing Wall Hanging - Class supplies - Ruth Green

We will need to have an ironing surface, a cutting mat, and electricity for each person to have their sewing machine plugged in. We will also be using mini irons right by their sewing spot. Those will need electricity. I have 5 mini irons that I will be bringing with. If anyone has a mini iron at home it would be great if they could bring it. If someone has a light box that would be great to have there also. I will have 5 light boxes.

I will be bringing Black threads, 4.0 twin needles and Frixion marking pens in case someone prefers to just buy them there, or they break a needle.

What they should bring to class;

Sewing machine

Regular sewing needle

scissors

2 black threads and a bobbin filled with black thread

rotary cutter

A fabric marking tool that will come off the fabric. I will have some for sale.

a seam ripper, hopefully not to be used except as a tool

It would be helpful if everyone looked at the sewing machine manual to see how to thread their machine for a twin needle, as I am not an expert on machines. They will need the attachment for their machine to hold the second thread spool.

I am looking forward to coming to your group.
